

Jury Laudation

German Parliament

The German bundestag portal is a virtual intersection for German citizens with their elected representatives. It provides services ranging from e petitions, video TV.....

The WSA expert panel decided that in a group of outstanding projects representing the eGovernment projects globally that this was one that represents best in category.

The challenges for modern governments that create eGovernment sites is one of balancing multiple needs across the public and private sphere while maintaining the highest level of integrity and ethics. At the same time create a universal design that is acceptable across all constituents and generations; for both public and government officials.

It is the opinion of the expert panel that these challenges have been well orchestrated and expertly executed in the German site.

Of special note is the virtual tour of the Parliamentary (fact check) called virtual eagle with helps explain and enhance the understanding of the state of the art building and its high quality art collection.
